

Finisher, Model UHF-210A

Finisher, Model UHF-210A

Overview

The JBT FoodTech UHF210A Finisher, a hybrid of proven screw and paddle designs, has capabilities for a full range of citrus processing, including juice finishing (separating juice from pulp), oil finishing (separating frit from the oil water emulsion), and recovery of soluble solids (pulp wash).

Features

- Patented hybrid worm design (screw/paddle)
- Constructed all of stainless steel
- Adaptable intake to meet customer requirements
- Drive fully enclosed and guarded

Application	Capacity (GPM)	Motor (HP)	Motor (RPM)	Shaft (RPM)
Primary Juice	100-150	25	1800	750
Pulp Wash	100-150	25	1800	750

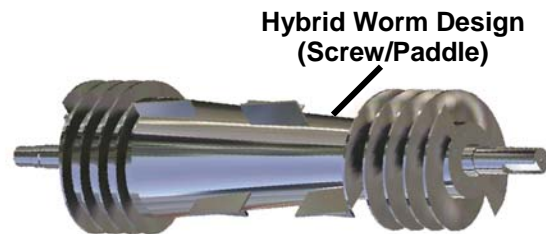

Note: Specified capacity depends on type of fruit, fruit condition, fruit variety, pulp quantity and pulp quality.

Optional Controls

JBT FoodTech offers an optional finisher process controls package designed to provide processors with the maximum yield at the lowest cost automatically.

Automated Screen Unblinding:

The Automatic Spray Ring (ASR) automates the process of screen unblinding. This option allows for uniform and consistent screen unblinding without the need for human intervention.

Covered under U.S. Patent: 5,638,745 and various foreign patents
